LIBYAN OIL OUTPUT CUT

The Libyan oil industry is in the midst of its worst crisis since the 2011 civil war because of lawlessness and strikes at major petroleum facilities.

1. _____. Operations had resumed on Sunday at the ports of Es Sider and Ras al-Unuf after a two-week stoppage. The two ports have a combined export capacity of around 600,000 barrels per day.

2. _____

Last week, Libyan Prime Minister Ali Zeidan warned of economic consequences of the off-and-on disruption to oilfield, production and export terminals. He said oil exports had plunged by 70 percent - a devastating financial setback for Libya, which relies on oil exports for nearly all of its foreign revenues.

Oil industry officials said the export terminals at the Es Sider, Amna and Sirtica oilfields had already filled up their storage tanks to capacity and had to shut down production.

Libya's oil minister said on Monday the government was working to end the disruptions by meeting with the protesters and appointing a new head of the Petroleum Facilities Guard

3. _____

"Groups closed the ports of Ras Lanouf, Zeutina, Al-Sedra and Al-Hariga, forcing a drop in production to less than 30 percent of normal levels," Zeidan told reporters.

Over the past few months the oilfields and export terminals have been affected by everything from striking security guards to militias fighting over who should get security contracts. There also has been criminal looting at petroleum service centres and production facilities and fears of terrorist activity by al-Qaida or other jihadist groups. A surge in bombings, assassination and a mass jail breakout in the country's second-largest city, Benghazi has added to the insecurity.

According to the country's oil minister, Abdelbari al-Aroussi, Libya is now only exporting 330,000 barrels through the port at Zawiya, 4. _____.

Oil accounts for more than 80 percent of Libya's gross national production and more than 95 percent of exports. The country's oil production stood at 1.6 million barrels a day just before the 2011 uprising that toppled Muammar Gaddafi. During the NATO-backed uprising oil production it shrunk to just 60,000 barrels a day, according to the International Energy Agency.

5. _____

But oil industry insiders told VOA they thought the numbers were exaggerated and the output was at least a quarter of a billion barrels a day short of the government claims. Some still remain sceptical about the government figures.

"It isn't that hard to play around with the numbers," said a foreign oil consultant, who declined to be named, fearing to do so could jeopardize his future work for Libya's National Oil Corporation. "Production did resume quite quickly because everyone took a short cut when it came to repairs and delayed replacing pipelines and equipment that are past their optimum life spans."

Security issues and the resulting supply disruptions plaguing Libya's oil industry are deterring some major foreign oil companies from competing for contracts to manage the fields, say oil analysts. Industry experts say some oil majors such as Royal Dutch Shell have been cautious about bidding for contracts or expanding operations in Libya.

Although denying it was pulling out of Libya, late last year Shell suspended some exploration projects in the country, arguing the results had been disappointing. 6. _____ .

"Shell wants a stable security environment - and they aren't the only ones worried about strikes, opportunistic gun attacks and spotty security. No one wants to see a repeat of the al-Qaida attack earlier this year in Algeria," said a foreign oil consultant, who has reviewed the workings of the recently created Petroleum Facilities Guard.

"The Libyan government is still a long way from consolidating control of the country's oilfields, pipelines and ports," he says.

A. the one remaining export terminal that so far has been free of disruption or strike activity by the guards demanding back pay and better salaries

B. but that appointment also appears to have enraged some of the strikers

C. without which Libya will struggle to repair the damage caused by the war which saw Gaddafi overthrown.

D. The work stoppage came just hours after gunmen wounded a guard and ransacked an oil service centre Sunday evening in the eastern oasis town of Awjila. Libyan officials said they believe the attack was linked to the competition between militia groups over oilfield contracts and the placement of their members in the newly created national Petroleum Facilities Guard, a force

under the direct authority of the Defence Ministry, but made up largely of former militia members who had often fought among themselves.

E. Industry insiders say the key reason for that decision revolved around security concerns.

F. In the latest disruption, security guards re-imposed a strike they called off over the weekend, forcing the closure of Libya's two main crude oil export terminals.

G. Libya's transitional authorities were quick to encourage foreign oil companies and the Libyan National Oil Corporation to resume production quickly after fighting stopped. In the autumn of 2011, to the surprise of foreign oil experts, they claimed production almost matched pre-war levels.
